

# 3 IDEAS FOR A SMART HOME

Save yourself money, time, and worry with these Smart Home devices.

Sense Flex Home Energy Monitor\*

## 01 ENERGY MONITOR

Sure, it's pretty to keep those backyard decorative lights on all night, but what is it costing you in real dollars? Questions like this are on homeowners' minds as they try to save money against the steady flow of energy costs increases. Plan your usage of appliances and lights to fit your budget by installing a home energy monitoring device. These smart devices will help you save money by understanding how you consume energy at home.

## 02 LEAK DETECTOR

Small drips turn into a disaster, given enough time to rot the backside of the wall where it is happening. Many insurance companies will exclude damage from slow leaks in homeowners insurance, leaving the expense to the homeowner. Get ahead of the potential damage by installing a leak detector. You can install them either at particular locations or use a whole-home leak detection system installed at your water main.

LOCKLY Vision Deadbolt  
with Video Doorbell

## 03 SMART DOOR LOCK

We've all had a moment of panic or two about locking our doors. Did I remember to lock the door before I left for work? Did I remember to put my key in my pocket when I went for a bike ride? Will my kids be able to get into the house on their own? A smart lock takes care of all those problems and more. A few smart lock products will have extra benefits like video doorbells and fingerprint entry. Relax while away from home by installing smart locks on your doors.
